

Pilings / Timbers

We can provide Greenheart pilings for all types of marine applications.

Known world wide for its durability, rot resistance, and marine bore resistance, Greenheart pilings will last a lifetime. Naturally resistance Greenheart is the right choice when considering the balance between service life and protecting the environment against chemical that can leach out of some types of pilings. Sizes range from 12 -20" diameter with lengths up to 75'. Let us quote your next project from our stateside inventories or direct shipments from the source.

Wallaba poles have long been the standard for transition poles in the Caribbean basin. Clear, straight, and durable, these poles are available in sizes ranging from fence post, 3"dia. x 8-12', to diameters of 12" and lengths up to 40'. Wallaba is naturally durable with no chemicals to harm the environment. Other Wallaba products include decking, siding, and shingles for roofing and siding.

Large timbers in fixed widths and thickness are available in sizes ranging from 6" up to 16" square and 30 feet in length. Mostly in Greenheart and Purpleheart (other species also available) these timbers are useful for many projects such as bridge construction, docks and piers, railroad ties, erosion control walls, and any other type of construction which requires strength and durability. We can have timbers cut and bored to meet your specific job requirements. All available species are of types that are naturally durable requiring no chemical treatments.

We also stock a full line of decking products in several different naturally durable species like Ipe, Greenheart, Purpleheart, Wallaba, and Red Balau.

Let DLH put our 100 years of wood products experience to work for you.
